

FACT SHEET SEMPERGREEN® CLICK 'N GO LIGHT SEDUMTRAY

MATERIAL

The Sempergreen® Click 'n go Light Sedumtray is a container made of recycled Polypropylene (PP). The precultivated trays comprise six to eight different species of Sedum. The plants grow on a special substrate developed by Sempergreen®. The Sempergreen® Click 'n go Light Sedumtray boasts at least 95% coverage upon delivery. The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions.

APPLICABILITY

The Sempergreen® Click 'n go Light Sedumtray is a ready-to-use tray that can be applied directly on the roof for an instant green result.

This tray can be installed on flat and slightly sloping surfaces of up to 20 degrees. If the roof pitch is more than 10°, we recommend the incorporation of anti-shear measures.

DELIVERY AND INSTALLATION

The Sempergreen® Click 'n go Light Sedumtray can be ordered by piece. Each tray measures 37.3 x 57.3 cm. For the outer row of trays, please take into account a size of 39 x 59 cm per tray.

The Sedumtrays are very easy to install; they can be clicked together. To protect the roofing we recommend placing a protective cover underneath the trays, which absorbs 3 L/m² water.
