

FACTSHEET SEMPERGREEN® DRAINAGE TYPE 525 (25 MM)

MATERIAL

Drainage type 525 is a drainage plate with dimpled cores of recyclable HIPS (High Impact Polystyrene).

APPLICABILITY

Drainage type 525 can be applied on green roofs, depending on the build-up of the roof.

Drainage type 525 is to be used in combination with a protection fleece and a filter fleece, which can be supplied separately.

DELIVERY AND INSTALLATION

The plates are supplied in 2.2 m²:
2.02 meter long by 1.10 meter wide.

During installation the plates need an overlap of one wave. A loss of 3% due to the overlap should be taken into account.
