

## FACTSHEET SEMPERGREEN® GRAVEL 16 / 32

### MATERIAL

Shaded gravel with an average particle size of 16-32 mm.

### APPLICABILITY

Gravel can be applied to create a vegetation-free zone on the roof. Gravel also keeps substrate and other small materials away from the roof drain. Using gravel in this way will prevent the drain from becoming blocked.

### DELIVERY AND INSTALLATION

Gravel is available in bags of 20 kg or in big bags of 1 m<sup>3</sup>.

Gravel can be applied at the edges of the roof, around drains and around other objects, such as air conditioning units.
