

FACTSHEET SEMPERGREEN[®]

ROOF GARDEN SUBSTRATE EXTENSIVE

MATERIAL

Extensive substrate consisting of lava, pumice and compost. Extensive roof garden substrate is produced in accordance with FLL guidelines.

APPLICABILITY

Substrate is the growth medium in which plants grow. Extensive roof garden substrate is an excellent surface suitable for extensive planting such as Sedum because of its porous effect. Extensive roof garden substrate can be used on roofs with a slope of up to 45 degrees (depending on the system build-up).

DELIVERY AND INSTALLATION

Substrate can be supplied in 20 liter bags and big bags of 1 m³.

When desired substrate can also be blown or poured by a tip up truck.
