

FACTSHEET SEMPERGREEN® SEDUM CONDITIONER

MATERIAL

Sedum Conditioner is a controlled-release fertiliser. Sedum Conditioner is supplied as an NK fertiliser; it contains coated nitrogen (N) and potassium (K). Besides the NK-ratio Sedum Conditioner also includes magnesium and trace elements. The environmentally-friendly coating ensures a gradual and controlled release of the nutrients.

APPLICABILITY

Sedum Conditioner is a controlled-release fertiliser to give your Sedum a boost during 9 months.

Sedum Conditioner improves the rooting of the Sedum, which results in healthy, productive plants.

DELIVERY AND STORAGE

Sedum Conditioner can be ordered in buckets of 1, 5 or 20 kg.

Store in cool, dry conditions and keep away from direct sunlight.

DOSAGE

1 kg per 40 m² Sedum.

The ideal application period for Sedum Nutrition is late April and early September.
