

# FACTSHEET SEMPERGREEN®

## SEDUM NUTRITION

### MATERIAL

Sedum Nutrition is a 100% organic NPK fertilizer that has been specially developed for the maintenance of Sedum roofs. This organic fertilizer has a low NPK (2-1-1) content that is slowly released from the organic material. This prevents leaching into the environment. In addition, the nutrition also contains essential trace elements and microalgae. By adding microalgae, this fertilizer contains a rich source of amino acids and vitamins.

### APPLICABILITY

Sedum Nutrition meets all needs of a Sedum roof. It provides a strong root system for the Sedum plants and thus increases plant health. In addition to plant stimulation, it also contributes to soil improvement. The microalgae also contain positive soil bacteria and soil fungi that ensure a balanced substrate layer.

### DELIVERY AND STORAGE

Sedum Nutrition can be ordered in buckets of 5 kg.

Store in cool, dry conditions and keep away from direct sunlight.

### DOSAGE

The recommended dose is 1 kg per 20 m<sup>2</sup> Sedum.

The ideal application period for Sedum Nutrition is late April and early September. The best result is achieved when rain is expected. The nutrient elements become available quicker when it rains, which results in an optimal functioning.
